AbsoluteIDQ[®] p180 kit

Metabolomics provides the combined read-out of genetics, environment and lifestyle in health and disease.

biocrates.com

Mass spectrometry-based metabolomics kits

Ready-to-use

Automated workflow

Standardized, quantitative

High throughput

For research use only | not for use in diagnostic procedures.

AbsoluteIDQ[®] p180 kit

Proven technology

- ▶ The gold standard in quantitative targeted metabolomics
- ▶ 188 quantitative metabolites covered
- ▶ Leading technology established in hundreds of laboratories globally and more than 1000 peer-reviewed publications

High throughput and more applications

- ▶ High throughput and more precise coverage
- ▶ Versatile application in almost all biological fluids and tissues
- ▶ Utilized in many leading large epidemiological cohorts

Kit components

Reagents & consumables

- ▶ Patented 96-well filter plate
- ▶ Internal & calibration standards
- ▶ Quality controls
- ▶ System suitability sample

Methods & protocols

- ▶ Sample preparation protocol
- ▶ Instrument-specific acquisition and quantification methods
- ▶ System performance evaluation

Workflow manager MetIDQ[™]

- ▶ Process guidance
- ▶ Automated technical validation
- ▶ Basic statistics (optional)
